Application/Control Number: 10/044,803

Art Unit: 3753

Claims 1-29 are pending.

The drawings are objected to as set forth on the attached Draftsperson's Review PTO-948. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over the device disclosed in the prior art of instant figures 1-10 of the application in view of Anderson.

The device of the prior are disclosed in Figures 1-10 of the instant application discloses all the claimed features with the exception of having smooth transitional surfaces between the rectangular conduit section and the round conduit section containing the flow damper.

The patent to Anderson discloses that it is known in the art to employ transitional sections of a connecting portion of a conduit coupling two different diameters or shapes together in which "the cross-sections... at the junction changes gradually from that of one section to that of another without the creation of sharp corners" or other protrusions

Application/Control Number: 10/044,803

Art Unit: 3753

for the purpose of coupling two distinct differing conduit sections together without inhibiting fluid flow through the change over section.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in the device of the prior art of instant figures 1-10 a connecting portion coupling the rectangular section to the round section in which the junction changes gradually from that of the rectangular section to that of the round section without the creation of sharp corners or other protrusions for the purpose of coupling two distinct differing conduit sections together without inhibiting fluid flow through the change over section as recognized by Anderson.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Rivell whose telephone number is (703) 308-2599. The examiner can normally be reached on Mon.-Thur. from 6:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel can be reached on (703) 308-1272. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
